### NVG & LOW LIGHT OUTLAW STEEL RIFLE MATCH

**\*\*REGISTRATION 1800 - 1915\*\***

<b>Course Cost</b>	<b>\$50</b>
--------------------	-------------

This event is a NVG or Low Light Rifle Steel Match. It's 4 stages of rifle and pistol steel shot from 2 different distances for a total of 8 stages. Each shooter will stand in a box and engage all steel plates in any order but has to finish by hitting a designated stop plate last. Each shooter will have the opportunity to shoot the stage 3 times, best time will be recorded. Shooters choosing to shoot the stage with a weapon light have to shoot the stage with that light or a hand held light. If using NVGs then IR laser has to be used.

Shooters need to register online at [shoottc.com/training](http://shoottc.com/training) . If shooters would like to get their score for the match they must click on the [practiscore.com](http://practiscore.com) link within the registration page. We will also hold open registration at the HTC from 1800 and ends at 1915hrs, promptly.

How fast can you efficiently shoot the plates, whether using NVGs, a gun mounted light or hand held flashlight??

If you have any questions, please contact [shoottc.com](http://shoottc.com) or [tacuptraining](https://www.instagram.com/tacuptraining) on Instagram.
